Information Technology

(2016; 10-29-2018)

Recommendations, Suggestions and Help:

It is recommended that each department designate two people who are able to maintain their respective web pages. The purpose of this guide is to provide easy to follow steps on how to update and change your department's webpages ensuring that content is always current and pertinent.

If there is a need for any other complex additions, please contact the webmaster at **dewon.hall@mvsu.edu** or dial 3724.

The new MVSU website is very powerful and will continue to grow along with the University. Let's work together to make THE VALLEY, the premier University in the Mississippi Delta, nation and world.

Table of Contents:

Logging Into the Website	1-4
Page Editing	5
Rules of Thumb	7-8
Copy & Paste	9-11
University Colors & Applying Color.....	12-15
Headers & Horizontal Lines	16-17
Uploading/Linking Files & External URL's	18-38
Uploading a File	18-25
Linking to a File	26-33
Linking to a External Website	34-38

The Login Page:

Scroll down to the bottom of the homepage (or any page on the website) and click the “Admin” link. Log in using your username and password. Once you’ve logged in, scroll through and find your respective department page(s). You should be able to edit the pages you have access to. If not, please email the webmaster with the list of pages you need access to at **dewon.hall@mvsu.edu**.

Page Editing:

Once you find your webpage(s), you will see the two gray tabs -***View and Edit.***

View - Allows you to see your page as it is on the website.

Edit - This is where you edit your content and/or upload files. The toolbar allows great flexibility. As with learning anything, play around with the toolbar to see what you can do with your page. There are options to really make your page(s) appealing, but consistent.

Quick Tip on line spacing:

For single spaced lines:

On PC: Press Shift and while holding shift, press Enter

On MAC: Press Shift and while holding shift, press Return

For double spaced lines:

On PC: Press Enter

On MAC: Press Return

Some rules of thumb:

The website is an extension of that MVSU brand. This guide is designed to ensure consistency across the MVSU website. When building your webpages,

DO NOT change the font. The font style is already defined within the framework of the website. To ensure this, leave the font option in the toolbar set to “Font”.

DO NOT apply any special formatting to text, outside of what is recommended within this guide.

Copy & Paste:

A few notes about Copy & Paste. Keeping the font consistent is important. If you copy & paste directly from a Word Document into the editor box, the system may use the fonts within that Word document, which may not provide the desired outcome. To copy & paste from a Word Document, click the “Paste From Word” icon in the toolbar. You will see a dialogue box. Copy & Paste your text there.

USING THE OFFICIAL UNIVERSITY COLORS AND OTHER VISUAL ELEMENTS TO CREATE A NICE VISUAL HIERARCHY:

You can do this by adding colors, highlighting content, and using headers/ horizontal lines. This will be covered in the next few pages. In some cases, you may need to make some sections larger than other portions and add different colors. To break up or highlight content, use a header with a different color. It helps to break up long sections of copy. You can also use a “Horizontal Line” if needed.

The Official University Colory:

Hex Colors for the web are: Green - #026937 • Red - #CF0A2C • Gold - #EDAA00

Copy & Paste or type the colors in the “Text Color” box (include the # symbol).

See the examples below;

HEADERS:

Headers are great when you want to highlight certain areas in your content. In the toolbar, you will see “Format.” After clicking the button, a drop down menu will give you format options.

HORIZONTAL LINES:

These are also good when there is a need to break up content.

Uploading/Linking Files and External URL's:

Uploading and linking files is very easy. *Please Note: The new website can handle large pdf files and images up to 45MB. However, it's best to practice uploading smaller images and files to make sure website speed is at a maximum.*

UPLOADING A FILE. Simply click the “Image” icon in the toolbar. A pop up box appears. Click “Browse Server.” You will see another pop up box, then click “Upload.” From there, you will have access to the files on your computer. Find your file, and click upload, after it's selected. You have the option to “Create a Thumbnail”.

Tip: To open any external link (URL) or file in a NEW website tab, after you've selected your file or input the external URL, choose the target tab. Then in the "target" dropdown, select New Window(_blank). This allows a file or external URL to open in a NEW browser tab so that the website visitor WILL NOT close out the website window they will return to.

Once this is done, click the "Link Info" tab to see your link.
