Welcome to the EBSCO Discovery Service (EDS) tutorial. EDS provides you with access to your institution's entire collection via a single, customizable entry point. In this tutorial, we will look at performing a basic keyword search and review the unique features available within EDS. Because the EDS interface is customizable by administrators, your searching experience may vary from this demonstration.

Searching: University Library Collection

Keyword  **Search** ?

[Search Options](#) | [Basic Search](#) | [Advanced Search](#) | [Search History](#)

We'll begin by conducting a search for *Global Warming* from the Basic Search screen. Simply enter your search terms and click the **Search** button.

Note that due to the depth of article-level detail available in EDS, combined with powerful relevancy ranking and value-ranking algorithms, you can retrieve excellent results without having to apply limiters or expanders to your search.

## EBSCO Discovery Service

### EBSCO Discovery Service

EBSCO Discovery Service provides users with an easy, yet powerful means of accessing all of an institution's information resources through a single search. This is achieved by harvesting metadata from both internal (library) and external (database vendors) sources, and creating a pre-indexed service of unprecedented size and speed. Although the resulting collection can be massive in size and scope, the fact that it is indexed locally (on the EBSCOhost® servers) allows for exceptionally fast search response times. As no two institutions are the same, EBSCO Discovery Service offers a vast array of customization options with regard to both the underlying collection of metadata as well as the front-end delivery of search results. All of this functionality is based upon the powerful EBSCOhost search experience familiar to researchers worldwide.

**Note:** With many customization options for available to administrators, your EBSCO Discovery Service appearance will be unique.

### OPAC on EBSCOhost

OPAC on EBSCOhost brings your Public Library catalog, databases, and readers' advisory together in a single search experience, leveraging EBSCO's expertise in loading and enriching data along with the popularity of the EBSCOhost interface, enabling libraries to use EBSCOhost as the front end of their online catalog.

### EBSCO Support Site

EBSCO's [Support Site](#) is available 24 hours a day, 7 days a week. Our FAQ database, [tutorials](#), and user guides can provide answers to your technical questions.

EBSCO Customer Support Representatives are also available by [phone](#) and [e-mail](#) 24 hours a day, Monday through Friday, as well as Saturday and Sunday from 9 a.m. to 5 p.m. (US EST).
